

VNS2270

TWO-WAY INTERCOM STATION Instant Voice Communication

Simple Operation, Easily Expandable, Reliable Communication

The VNS2270 Intercom Station is designed to be used as part of a wireless intercom system in applications where the installation of traditional hard-wired intercom system is impractical or too costly.

When the VNS2270 intercom station is paired with the VNS2210 paging controller, a fully wireless intercom system can be implemented for long range two-way communications.

The VNS2270 intercom station also offers Hands-Free and Auto-Answer optional operation modes, so answering a call and/or having a two-way intercom communications can be done without pressing the station button.
