

VP-4

ALPHANUMERIC PAGER Instant Text Notifications

Four Line Pager with Adjustable LCD Screen, Date and Time Display, and Vibrate and Tone Modes

The VP-4 is a four-line Alphanumeric Pager that is designed to function as an emergency pager where lengthy text messaging is needed. The VP-4 can also be set as two lines of large text for easy reading. It comes with one disposable AAA alkaline battery, safety lanyard and carrying case. The VP-4 has message time stamps and unread message reminders with adjustable vibrate and tone modes so you're sure to get any alerts that come through. The display shows date, time, and low battery indication on its adjustable contrast LCD screen with back-light.

The VP-4 alphanumeric pager supports 6 activation codes (ID's) for individual activation or membership activation in 5 separate groups. Creating groups provides the ability to activate multiple devices using a single transmission from a main wireless paging base station.
